The Ecologist

The Future of an Affluent Society -- The Case of Canada, by Edward Goldsmith. Price $1.50

In 1975, Environment Canada commissioned Edward Goldsmith, editor of The Ecologist and co-author of the now world famous A Blueprint for Survival, to look into the factors that will shape Canada's future. His report is published as a special issue of The Ecologist in June. In it, he warns that Canada is at a cross-roads in her history. Like all affluent societies, she is confronted with a stark choice between continuing on her present course and facing social and ecological catastrophe — or changing her aims and moving towards a stable society capable of long-term survival. The idea of the "Conserver Society" is fully accepted in many circles. But Goldsmith does not see the move from a "Consumer Society" to a "Conserver Society" as sufficient. It cannot be more than the first step towards the development of an "Ecological Society" — one in which the scale of political and economic activities is considerably reduced, and where smallness, self-sufficiency and a new sense of responsibility combines to ensure a sustainable and more satisfying future.
